

WOMEN'S CHRISTIAN COLLEGE, CHENNAI

MANUAL OF

STANDARD OPERATING PROCEDURES

Standard Operating Procedures (SOPs) provide a detailed set of instructions that will enable consistency in execution of the routine activities pertaining to the institution and conformity to expected standards. The manual of SOPs of Women's Christian College presents the Policies and Procedures of the college to all concerned, thus ensuring knowledge of rules and procedures for the smooth functioning of the institution.

This manual is divided into three sections:

- 1) Policies
- 2) Code of Conduct
- 3) Standard Operating Procedures and Guidelines
- 4) Functional Roles and Responsibilities.

Procedure:

1. The complainant to give a written complaint to the Chairperson.
2. The Chairperson to convene a meeting with the committee within 7 working days of receiving the complaint.
3. The committee to meet with the complainant and alleged person/persons separately in a closed session.
4. Statements of both parties to be recorded and if allegation of sexual harassment is justified on the basis of the given guidelines and the consensus of the HCC, suitable action will be initiated within 15 working days.
5. Punitive action will be taken based on the guidelines of the UGC.
6. In case of frivolous or false allegation action to be taken against the complainant.
7. Confidentiality of all meetings, statements, recordings to be strictly maintained.

INFORMATION RESOURCE CENTRE

1. Circulation of IRC Documents (Books Issue and Return)

Guidelines:

- Valid ID card is mandatory for the candidates/faculty.
- Issue of number of books is as follows
 - 2 subject books and 1 fiction for UGs,
 - 3 subject books and 1 fiction for PGs,
 - 4 subject books for research scholars (M.Phil/Ph.D),
 - 10 books for permanent faculty and
 - 5 books for new faculty.
 - Only reference is permitted for guest/part-time faculty.
- Borrowing period is 6 days for subject books and 14 days for fiction. For faculty, the period is for a semester.
- Overdue charge of Rs. 5/- is levied for the first day and Rs. 10/- for each following day will be collected from the candidates. Faculty can borrow books for the next

semester only on submission/clearing all books borrowed in the previous semester.

- Reference books/Journals are only for reference purposes. Faculty members may borrow them for overnight or weekends on a request made to the Librarian. However, it is strictly followed as per Librarian's discretion.
- Loss of cards/books must be immediately brought to the notice of the Librarian.
- Misuse of Library documents/mutilation/malpractice is of serious concern which will lead to a permanent cancellation of membership.

2. Plagiarism Check - Generation of Plagiarism report for research documents/articles/dissertations/projects/thesis

Procedure:

- The softcopy of the document must be mailed to the Librarian (to the intimated mail IDs) and the same should be duly intimated.
- The softcopy will be accepted by the Librarian only if it is submitted by the research supervisors.
- In case of multiple documents, the research supervisor may send zip files/compressed files.
- The reports should be sent to the IRC for verification 5 days prior to the deadline assigned.
- The documents will be scanned using a plagiarism software and the report will be mailed to the sender.

3. Usage of e - resources

Guidelines:

- All candidates, research scholars and faculty members can use the online databases for accessing e-resources.
- The users must obtain the log-in credentials from the Librarian to access these sites.
- Users may access these databases remotely or at the IRC.
- Sharing of log-in credential is a violation as per the Copyright Act and it is will be dealt with strictly.

5. Acquisition Process (Purchase of Library Books by Departments)

Procedure:

- Subject books will be selected by the subject experts of the departments. However, general topics will be selected by the Librarian.
- Only authentic book publishers/distributors/sellers should be entertained.
- The selected books should be sent to the library within in 2 working days of the selection, along with triplicate bills duly signed and sealed by the vendor/Head of the Department. Price Proof from the publisher should be enclosed for international books procured.
- The bills as well as the books should be checked thoroughly before being submitted to the library.
- Only latest editions/new copies are to be selected.
- The bill should clearly state the account to which it is to be tagged.
- The given budget should not be exceeded and the expenditure has to be closed prior to the deadline set by the Bursar/Librarian

6. Stock Verification - Checking of the availability of documents purchased for the IRC

Guidelines:

- All issued books should be returned to the library for the physical stock verification
 - Library software/Manual method is used for the verification
 - The Report of the lost books must be prepared and submitted during the Library Executive meeting and periodically withdrawn from the library database. The titles will be added back to the current collection if they are traced in the following academic year.
-

4. Assistance is provided to students in obtaining appointment letter, if selected.

HUMAN RESOURCE MANAGEMENT

SOPs FOR OF INFRASTRUCTURE MAINTENANCE AND FACILITIES ON CAMPUS

With all due respect to the facilities provided by the college, all students, teaching and non-teaching staff should take the initiative for an optimal utilization of the resources and maintain the standard of infrastructure

Responsibility:

1. Principal of the Institution
2. Bursar
3. Human Resource Officer
4. Maintenance Manager

1. CLASSROOMS MAINTENANCE

Objective:

To provide an environment for students to learn and enjoy a level of comfort while learning

Responsibility:

1. Dean of Students Services
2. The Class Tutor
3. Students Senate
4. Maintenance Manager

Procedure:

1. Each student is self-responsible for the amenities utilized in the classrooms, which includes (seating and writing tables, chairs, writing boards, smart boards, cupboards, drawers, projectors, dustbins, fans, tube lights, windows, doors etc.,) and also for any damage caused to any of the above mentioned amenities.
2. The amenities are to be inspected at regular intervals to ensure they are in good condition and also to rectify any faults if found.

3. Cleanliness and maintenance of the classrooms are to be ensured through regular inspection.
4. Dustbins of two colours (green - degradable & red - non-degradable) are to be kept on the corridor of each floor to ensure the segregation of waste at the source.
5. Damaging/scribbling/drawing/writing/ on the furniture provided will not be allowed and strict action will be taken against the students found engaging in such activities.
6. No student is allowed to have any form of food inside the classrooms.
7. Students are allowed to sit in the corridors of their respective floors for having their food.
8. Any complaint related to the cleanliness and maintenance of the classroom can be intimated by any student to the HR Officer.

2. CANTEEN MAINTENANCE

Objective:

The canteen on our campus aims to provide quality food items for the staff and students at a fair price

Responsibility:

1. Members of Food Committee
2. Human Resource Officer
3. Maintenance Manager

Procedure:

1. A legal agreement is made for a period of time, between the food contactors and the college, to set up a food stall either in the space provided in the canteen or somewhere inside the college premises.
2. The quality of food items provided and the maintenance of hygiene and cleanliness of the food stalls and their employees will be monitored at regular intervals by any of the faculty in charge of the Food Committee.
3. Any complaints regarding the quality and overpricing of the food items supplied by any of the food stalls can be notified to the Principal in writing.
4. Usage of Non-biodegradable materials for packing food items is limited to an extent.

5. Students or staff who buy food items wrapped in plastic covers are responsible for their disposal in the bins provided
6. The space provided for dining should be well-maintained by each one who utilizes it.
7. Plates/spoons and cups taken from any food counter need to be returned to the respective food counter.
8. Paper plates, paper cups and food wrappers should be disposed in the bins provided in the dining area.
9. The individuals consuming food should dispose any remains or leftovers in the bins provided for the same.
10. Leaving of the food remains or leftovers on the plates or on the dining tables will not be encouraged and the individual should be responsible for its disposal
11. Keeping the dining area neat and replacing the chairs in their place after use will be highly appreciated

3. **WASHROOM MAINTENANCE**

Objective:

To provide a clean and hygienic environment for the staff and students and to ensure improved healthier practice of self-hygiene

Responsibility:

1. Human Resource Officer
2. Maintenance Manager
3. Students Senate

Procedure:

1. Washroom maintenance charts/checklists will be made every month and a housekeeping staff will be allotted to ensure the cleanliness of washrooms.
2. Cleaning at regular intervals is to be carried out and random checks to be undertaken by the Maintenance Manager/HRO.
3. The allotted housekeeping staff will be held responsible if the restrooms are found in a bad condition or are poorly maintained.

4. Any fault or defect in the washrooms should be intimated immediately to the Maintenance Manager so that they are rectified at the earliest.
5. Any complaint regarding the cleanliness and maintenance of the washrooms can be intimated to the Maintenance Manager or to the HRO

4. COMMON ROOM MAINTENANCE

Objective:

To provide students a safe and comfortable environment to learn, discuss subject-related topics and co-curricular (like club activities) activities, along with a locker facility for better protection of their belongings.

Responsibility:

1. Human Resource Officer
2. Maintenance Manager
3. Students Senate

Procedure:

1. Students who are utilizing the facility of common room should be self-responsible for the amenities they are provided with.
2. Furniture and lockers should be handled properly and any damage caused has to be intimated immediately to the Maintenance Manager.
3. Food of any form should not be brought into the common room, to ensure the purpose of the facility and to maintain it.
4. No students are allowed to use mobile phones in the common room. Action will be taken against those who were found using it. No students are allowed to use mobile phones in the common room and action will be taken against those who were found using it.

5. RO PLANT

Objective:

To provide constant supply of safe drinking water

Responsibility:

1. Human Resource Officer
2. Maintenance Manager

Procedure:

1. RO plant is installed for everyone to have access to safe drinking water for 24 hours.

Any fault found can be intimated to the Maintenance Manager.

6. PARKING OF VEHICLES

Objective:

To provide staff and students a facility to park their vehicles and ensuring their safety.

Responsibility:

1. Human Resource Officer
2. Maintenance Manager
3. Students Senate
4. Security Officer

Procedure:

1. Students can avail the facility of parking their vehicles inside the campus provided with a vehicle pass
2. Students and staffs are allowed to park their vehicles with a guideline of the security guards so as to ensure the optimal utilization of the space provided.
3. Each vehicle should have a vehicle pass of the academic year, which needs to be displayed on the vehicle in such a way that it is clearly visible.
4. If a student/staff use multiple vehicles, separate passes needs to be obtained for each of them.
5. No drivers are allowed to stay inside the campus after dropping any student.

6. Any lost item found in the parking space has to be handed over to the office person who is in charge of maintaining the Lost and Found record.

7. MEDICAL FACILITIES

Objective:

To provide students/staff an emergency medical aid inside the campus

Responsibility:

1. Principal of the Institution
2. Dean of Students Services
3. Human Resource Officer

Procedure:

1. A free Medical Centre (Apollo Shine) is available on the campus.
2. Students/staff who need anykind of medical assistance can approach Apollo Shine during the working hours.
3. Trained and well qualified nurses appointed by the Apollo Hospitals will be available on the campus during the college working hours for any emergency medical requirements.
4. In case a student/staff needs emergency medical assistance in their place, nurses will be available on call for giving first aid there itself.
5. Students/teaching/non-teaching and support staff can avail the General Health Check-up held twice annually in association with the various clubs of the college.

8. SOP FOR AVAILING COLLEGE FACILITIES SUCH AS CLASSROOMS, AUDITORIUMS ETC

Objective:

To provide an advantage of booking any facilities through intranet and to ease the procedure

Responsibility:

1. Principal of the institution

2. Human Resource Officer
3. Maintenance Manager

Procedure:

1. A faculty shall book any facility as a venue for a workshop, conference, paper presentation, guest lectures, department program (including intercollegiate cultural events) etc., through the intranet using their login ID, with prior notification to and an approval from the Principal.
2. The booking can be done by selecting the date and time in the facility booking/cancellation tab available in their individual login ID.
3. The available venue for the given date and time can be selected along with other sub-facilities, by mentioning the purpose of booking.
4. After the completion of an event, the organizer/faculty who booked the venue will be considered as responsible for the proper handing over of the venue and other sub facilities used.
5. If any property of the venue is found missing/ damaged/ broken, the organizer/faculty-in- charge who booked the venue will be considered responsible and a replacement or repair of that missing/ damaged/ broken property needs to be taken care of by them.
6. All the electrical and electronic equipment used for the event should be handed over to the venue-in-charge
7. Any damage to any of the equipment or facility utilized should be immediately intimated to the venue in-charge.
8. No food items should be taken into the venue by any student.
9. The venue in-charge has to be intimated as soon as the event gets over.
10. Based on the availability, a classroom can be used for an event with prior notification to, and approval from the Principal.

9. SECURITY OFFICE

Objective:

To monitor the movement of people or goods in and out of the college campus and ensure students/staff a safe and secured environment free from intruders

Responsibility:

1. Principal of the Institution
2. Bursar
3. Human Resource Officer

Procedure:

1. The security guards should not permit into the campus any student who fails to wear the ID card so as to prevent intruders.
2. The vehicles of students/staff with valid vehicle passes will be allowed to be parked inside the campus which will be ensured by the security guards
3. The movement of resident/non-resident students during the working hours are monitored and separate registers maintained. Gate passes issued by the Heads of Departments or wardens are collected and kept at the Security Office.
4. Visitors of any student/staff should be asked to enter their complete details in the Visitor's Register maintained at the Security Office and then be provided with a Visitor's Pass. They must obtain the sign of the student/staff they visit on the pass.
5. The in and out movement entry and exit of any vendor/contract worker will be monitored and maintained in a separate register.
6. The in and out movement entry and exit of non-teaching staff will be monitored and maintained in a separate register along with a gate pass approved by their Department Heads.
7. No trespassers/intruders will be allowed inside the campus and if any are found, the Security Guards on duty will be liable.

In case of any life threatening situation caused by anyone to any student/staff/oneself, a security guard have all the rights to defend and attack the attacker by all possible means of safeguarding.

PHYSICAL EDUCATION DEPARTMENT

1. MAINTENANCE OF SPORTS FIELD

Objective:

To provide a clean, levelled playfield for the students to develop their sporting skills in an injury free environment

Responsibility:

1. Director of Physical Education and
2. Ground maintenance staff (Marker)

Procedure:

1. The outdoor play area for sports is maintained by clearing the grass regularly and by levelling and cleaning the play area to avoid injury while playing.
2. Branches from nearby trees that intrude into the play area need to be trimmed periodically
3. Vehicles should not be allowed to be enter/parked in the play area as the ground gets damaged and becomes unusable

2. MAINTENANCE OF GYMNASIUM

Objective:

To provide a clean and hygienic gym for the staff and students to develop their fitness

Responsibility:

1. Director of Physical Education
2. Ground maintenance staff (Marker)
3. Maintenance staff

Procedure:

1. The gym equipment are to be dusted and serviced regularly for wear and tear
2. The floor is cleaned daily

3. The equipment is placed on a non-slippery floor mat to avoid injury

3. MAINTENANCE OF INDOOR TRAINING FACILITY

Objective:

To provide a clean and hygienic training area for the staff and students to develop their sporting skills

Responsibility:

1. Director of Physical Education and
2. Ground maintenance staff (Marker)
3. Maintenance staff

Procedure:

1. The indoor training facility is maintained by sweeping and mopping the floor
2. Staff/students are allowed to use the play area only with proper shoes
3. Eating, combing and drinking beverages are not allowed inside the facility
4. A chart with date and signature is maintained to ensure that cleaning is done regularly and random checks are carried out to ensure hygiene and cleanliness
5. To ensure hygiene and cleanliness of the gym, a chart with date and signature is maintained. Random checks are also carried out

STUDENT SENATE

SENATE ELECTIONS BY THE ELECTION OFFICERS

ELECTION PROCEDURE

1. Schedule the election process date wise and get prior approval from the Principal.
2. Schedule to be displayed on the Staff notice board.
3. Principal's office distribute and collect filled-in nomination forms for all Senate posts only during the stipulated date and time.
4. General eligibility for all Offices:

- Faculty member in charge for conducting the Guest Lecture will arrange for Resource persons with prior permission from the principal and the Head of the Department.
- The Faculty in charge will be responsible for making arrangements for the venue, Refreshments and honorarium for the guest speaker.

Procedure:

1. The faculty member has to get prior permission from the Principal through the Head of the Department for conducting the guest lecture. All the details pertaining to the guest lecture (Resource person, Duration, Date, Timing) have to be mentioned in the permission letter addressed to the Principal.
2. On receiving permission from the Principal, the faculty-in-charge will make arrangements for the guest lecture.

USAGE OF LABORATORIES

DEPARTMENT OF PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

GENERAL INFORMATION

- **Physical hazard:** All electrical equipment, water bath, gas and Bunsen burner, UV light, broken glass slide/glassware, dissection needle and blade .
- **Chemical hazard:** Acids, alkali, reagents which produce fumes
- **Biological hazard:** Bacterial/ Fungal cultures

During Emergencies:

Equipment	Location
First-Aid Box	SB 47
Fire Extinguisher	In the corridor outside SB 46

Personal Protection:

- Wear gloves, cotton attire, lab coat, appropriate foot ware and mask while working in lab.

- Avoid long-free-floating hair or dupatta, which might lead to unexpected accidents.

Target Audience

S.No.	Users
1.	Course-in-Charge
2.	Course teacher(s)
3.	Laboratory Assistant(s)
4.	Students
5.	Housekeeping Staff

GENERAL INSTRUCTION FOR STUDENTS

Do's

- Follow your teacher's instruction or read protocol carefully before entering the lab and carry your respective Lab Kit (Lab towel, New blade, a pair of Dissection Needles, paint brush-No. 10).
- Maintain your workstation clean before and after use.
- Request for a pith or carrot piece before you take a section of any plant material, if required.
- Always remember to dispose used materials or sectioned plant materials into the laboratory waste bin.
- When lighting a burner, wait until the striker is in place before you turn on the gas.
- Lay electrical cords where no one can trip on them or get caught in them.
- Be sure your hands and work area are dry before using electrical equipment.
- Leave the reagents, equipment and glassware in its respective location.
Remember not to shift them from their place.
- Unplug cords by pulling the plug and not the cord.
- Switch OFF and unplug all electrical equipment at the end of the lab period.
- Push your seat/stool under your work table, so that the place does not look cluttered.
- Broken equipment/glassware should be reported to the course teacher and an entry be made in the register with the Lab Assistants immediately.
- Report to your Course-teacher in case of any emergency.

Don't s

- Do not to bring eatables into the lab.
- Take heed not to use cracked or broken glassware.
- Never reach across an open flame or burner.
- Never taste or smell any chemicals in the laboratory.
- Never pour water into a concentrated acid. Acid should be poured drop-wise using a glass-rod slowly into water with continuous stirring under icebath.
- Never “horse around” or play practical jokes in the laboratory.
- Dispose the used or left-over samples into the wastebin.

Course-in-Charge: Submit the list of Materials Required for the laboratory session ONE WEEK ahead and confirm if arrangements have been made at least a day before the laboratory session.

Laboratory Assistants:

- Provide necessary supplies for the respective lab session in accordance with the course requirement.
 - Extend assistance to the faculty and students during laboratory sessions
 - Check for arrangement of seat/stool in its place.
 - Ensure the gas valves are turned OFF after every lab session.
 - Switch OFF all electrical equipment after every lab session.
 - Upkeep and maintenance of the laboratory/museum
 - Periodical maintenance of the preserved specimens in the laboratory/museum
-

DEPARTMENT OF PSYCHOLOGY**Psychological Laboratory****Objectives**

The objectives of the psychological laboratory are :

- To provide training to the UG and PG students of the department in administration of tests and conducting of experiment, interpretation of results and writing of reports.
- To have a repository of a comprehensive variety of psychological assessments and equipment for psychological experiments.

Person in charge – Faculty

Protocol specified activities

Administration and scoring procedures for conducting experiments shall be developed by faculty and provided to the students. Administration, scoring and interpretation procedures for psychological tests and experiments shall be followed as per the instructions in the respective test manuals and procedures of experiments.

Ethical considerations

In case of external participants, written consent shall be obtained prior to psychological testing and experiments.

Maintenance of laboratory equipment, testing material and manuals

Newly purchased materials will be registered in the accession and stock registers.

All laboratory equipment, testing material and manuals are catalogued and stored in different folders. These materials will be routinely inspected, and any damaged items will be repaired or replaced on a regular basis.

Responsibilities of the lab assistant / attender

The lab attender should be available in the department whenever the UG practical hours and PG psychological testing hours are scheduled. The lab attender should make an entry of lab materials that are issued to students and faculty, and should ensure that all materials (as listed) are returned.

Regulations for students' use of lab materials

Students are permitted to use all laboratory materials within the department, as per their course requirements. For use outside the laboratory, students will have to submit a request letter signed by the course teacher and the Head of the Department, and will be

required to return the material on the next working day. A register will be maintained by the lab attender for issue of materials used for psychological experiments and tests.

Non-compliance of procedures

Any damage to the equipment / test material will require a replacement of the same by the student. If necessary, the entire test kit will have to be replaced. Loss of equipment / test material from the storage room will be the responsibility of the lab attender

DEPARTMENT OF ENGLISH

Language Lab:

- The schedule for the use of the Language Labs by the students of various classes is to be created.
 - The Lab Attendant's services are to be used for maintenance of the labs and for support in using the equipment.
 - Faculty of the classes in the lab should monitor the work of the students.
 - Any failure of equipment or systems should be brought to the notice of the Head or the faculty in charge for action to be taken.
-

DEPARTMENT OF HOME SCIENCE

PHYSIOLOGY LABORATORY

I. OBJECTIVES

This laboratory provides a platform for the students to

- 1) Enhance their theoretical knowledge by gaining practical exposure to the study of various human body systems with the help of histological slides, models and specimens.
- 2) Gain hands on experience on selected blood experiments as well as recording of blood pressure and measurement of respiratory rate.

II. GENERAL LABORATORY RULES

STUDENTS

These rules aim to provide a general understanding of laboratory safety. The rules will help the students to work safely in a laboratory environment and will serve as a preventive measure for accidents or incidents. Students need to be acquainted with the rules before embarking on any laboratory procedures.

Following rules must be strictly adhered to in the laboratory:

- Students must be appropriately dressed and their hair should be tied back before entering the lab.
- Silence should be strictly maintained in the laboratory
- Students are expected to bring their record book for every practical session.
- Only HB pencil is to be used for drawing in the record book.
- Students should remain in their work area during the session and avoid moving around unnecessarily.
- Do not operate any equipment without proper training and sufficient practice.
- Keep the laboratory work area clean, neat and uncluttered.
- Ensure that all water taps are closed after use.
- Care of microscopes: Post use, the objective of the microscope is to be shifted to low power, following which the light source should be turned off, and finally, the main power supply should be switched off.
- Report all accidents / incidents to the faculty in-charge
- Be familiar with locations of safety items like fire extinguisher and first aid kit.
- Wash your hands before and after every laboratory session with soap and water to get rid of any chemical/biological residues you might be inadvertently exposed to.
- All waste materials such as used cotton and lancets should be discarded into the bin.
- No food or drink is allowed inside the lab.

III. ROLES AND RESPONSIBILITIES

To build up a culture of personal responsibility and safety, a co-operative role between staff and students is crucial. It is recommended that these guidelines be followed:

FACULTY

- Brief students on laboratory safety and general regulations during the first laboratory session
- Ensure students have clearly read and understood the laboratory safety regulations
- Demonstrate good safety practices at all times in the laboratory
- Give procedural instructions for the experiment along with safety precautions to be exercised by students before beginning their laboratory work.

LABORATORY TECHNICIAN IN CHARGE

- Maintenance of overall laboratory cleanliness
- Maintaining equipment in functional condition
- Ensuring anatomical parts are placed correctly back into the model
- Checking proper functioning of safety devices.
- Ensuring that the fire extinguisher is within the expiry date
- Reporting requirements of consumables
- Initiating necessary repair or maintenance work
- Daily Operational Checks to be performed in accordance with laboratory safety procedures before and after every lab session.

IV.EMERGENCY EQUIPMENT

- First aid kit - Available in the physiology lab store room
- Fire Extinguisher - Available in the Physiology lab

BIOCHEMISTRY LABORATORY- UG AND PG

General Information:

1. Physical hazards: All heavy equipments, electrical and mechanically operated appliances, bunsen burners, hot water
2. Chemical hazards: Acids, alkali, odors from chemicals like ammonia, chemical sensitizers

During Emergencies:

Equipment	Location
First aid kit	Room No. 35
Fire extinguisher	2 in the corridor • One in front of Room No.33 • Second one in front of Room No. 34

Personal Protection:

- **Laboratory Attire:** Cotton clothes, knee-length lab coats, no dupatta/stole/scarf, appropriate footwear, hair to be tied
- **Eye protection:** Safety glasses

General Instructions for lab usage:

- Undergraduate and Postgraduate laboratory – course teachers, lab assistants, housekeeping personnel and students should be actively involved in the laboratory upkeep and maintain a safe environment.
- Course teachers play a vital role in disseminating appropriate instructions and monitoring the students.
- Lab assistants should check pipelines for gas and water before the start of any experiment, and ensure that gas valves are turned off after lab sessions.
- Lab assistants should make sure the equipment for the experiments are in working conditions, and provide necessary supplies/chemical solutions.
- Food or drinks to be not allowed in any lab.
- Visitors to be not allowed in any lab.

Responsibilities of students during lab sessions:

- Each student should read the procedure before coming to the lab.
- Monocular microscopes should be cleaned before and after use.
- Chemical reagents should be handled with utmost care.
- Pipetting or measuring chemicals should be used according to the procedures and instructions of the course teachers.
- Tasting or smelling a chemical is to be avoided.

- Accidental breakage of glassware and spilling of reagents should be reported immediately.
- Each student should clean the work table at the end of the lab session.
- Students should wash hands thoroughly with soap before leaving the lab.

Instructions for using Glassware- for UG and PG Labs

1. Burette: While filling reagents, burette should be handled above a sink, or a beaker placed below it. Burette funnel should be used for adding reagents, and the reagent should be added along the sides of the funnel. The burette should be rinsed with the same solution before it is filled. While using a burette with an inbuilt funnel, the burette should be in a slanting position while the reagent is being added.
2. Standard Flask: To avoid air bubbles, reagents should be added along the sides of a funnel placed over the mouth of the standard flask.
3. Test-tubes: Place test-tubes in water baths with sufficient water. Use a test-tube holder while removing test-tubes.
4. Pipette: Only pipette out reagents that can be directly pipetted, and has been specifically mentioned in the procedure. While pipetting, make sure that the reagent is slowly pipetted to avoid air bubbles, and also from entering the mouth. Use different pipettes for different solutions. Pipette fillers or pipette pumps can also be used.
5. Measuring cylinders should be used for acids, strong alkalis and saturated solutions.
6. Glass droppers should be dry before aspirating a solution, and this should not be placed directly on a counter after use.

Instructions for using Chemicals- for UG and PG Labs

1. Strong Acids and Alkalis are to be placed on asbestos sheets on the counters. These reagents should only be measured and not pipetted. Pipette fillers or pipette pumps can also be used for measuring acids.
2. All solvents to be placed separately in the designated room.
3. Chemicals which needs refrigeration should be taken out only at the time of use, and immediately placed back in the refrigerator.
4. Bromine vials should be opened only in a fume chamber.

5. For preparing any concentration of sodium hydroxide in a beaker, keep a porcelain dish filled with tap water under the beaker to trap the heat that would be released while preparing the reagent.
6. Lids should be properly closed after using the chemicals. Extra precaution should be taken while using Ethanol or any other Alcohol, or any volatile substance.
7. A clean, dry and separate spatula should be used for all chemicals to prevent contamination. The spatula after use should either be left on a tissue or a watch glass, and not placed on the counters.
8. While transferring any chemical to a slide for observation under a microscope, a coverslip should be used to prevent the objective glass from getting contaminated.
9. Hand gloves and masks should be used for weighing or measuring corrosive chemicals.

Instructions for Specialized Equipments:

Muffle Furnace- While using the Muffle, instructions should be written or pasted on it indicating the date and time of operation. Extreme precaution should be taken to open the door of the Muffle furnace only after 24 hours.

Soxhlet Apparatus (Manual) - The apparatus should be operated only when the outside temperature is cooler. No burners should be switched on while running this experiment. The time and date of operation can be indicated on a Board.

Digital weighing Scale- The instrument should be switched on at least 20 minutes prior to its operation. The doors should be closed while weighing any substance, and the pan should be wiped clean of any residual chemicals.

Digital Photo electric colorimeters- The instrument should be switched on at least 20 minutes prior to its operation. After calibrating the instrument, cuvettes should be wiped completely before placing it in the colorimeter.

Digital Kjeldahl and Soxhlet Apparatus- Continuous supply of water and power should be available.

FOODS LABORATORY**General Information:**

- Physical hazards: All heavy equipment, electrical and mechanically operated appliances, Pressure cooker, Hot water, Microwave oven, LPG stove, Knife
- Chemical hazards: NIL
- Biological hazards: NIL

During Emergencies:

Equipment	Location
First Aid Kit	Room No. 23 – UG Foods Lab
Fire extinguisher	One in front of Room No.23(UG Foods lab) Second one in front of Room No. 27 (PG Foods lab)

Personal Protection:

- **Laboratory Attire:** Cotton clothes, no dupattas/Stoll, scarf, lab coats, appropriate footwear, hair to be tied
- **Hand protection:** Oven Glove, Tongs to hold hot vessels

OBJECTIVE

The purpose of this standard operating procedure for the foods lab is to prepare all mise en place in a consistent and timely manner, in order to facilitate efficient lab sessions. The foods lab operations service standards defined here will help the students to achieve the lab's operational goals and standard.

General instructions for usage of Foods Lab (Responsibilities and procedures

1) The staff should ensure that the students enter the lab at the appointed time.

- All students meet the expected requirements of personal hygiene and wear the correct uniform and safety clothes.

2) Explain the menu items on a daily basis prior to service to all students.

- All the students should be familiar with the preparation for the different dishes.
- All the students should be familiar with the presentation and garnish required for each dish.

- Make sure the students are familiar with all the equipments needed in preparation.
- 3) Allocate the sections to respective students prior to preparation.
- All students are briefed prior to each class and are clear on their duties and responsibilities.
 - Any special requirements for each class or section should be highlighted.
- 4) Ensure that students involved in food production work in a professional and efficient manner at all times.
- Students should wash their hands properly, frequently and at appropriate times.
 - Students are to be fully competent in the preparation of the required dishes.
 - Students should adhere to all kitchen hygiene and safety procedures at all times.
 - The students should make sure that their work area is clean and tidy at all times.
 - The students should assemble all appropriate ingredients in advance to ensure efficiency and work productivity.
 - All initial preparations to be completed efficiently and items to be stored correctly until required further.
- 5) Assemble dishes in a timely and appealing manner.
- Crockery is correct, clean, polished and not damaged.
 - Dishes should be prepared in accordance with the standard recipes.
 - Every dish is checked before it is left for discussion- for presentation, quality and portion accuracy.
- 6) Ensure that the wash-up or stewarding area and equipment are clean and tidy.
- All equipment should be kept in a clean and safe state at all times.
 - Waste disposal facilities are effectively used.
 - Washed utensils, crockery, cutlery and glasses should be dried and placed correctly and safely.
 - All breakages must be recorded and careless breakages by the students should be noted.
-

TEXTILES AND CLOTHING LABORATORY

General Information:

1. Physical hazards: Mechanically and electrically operated sewing machines with sharp needles, rotary fly wheel and sharp scissors.,
2. Chemical hazards: Nil
3. Biological hazards: Nil
4. Electrical hazards: Electric shocks while operating electrical sewing machines

During Emergencies:

Equipment	Location
First aid kit	Room No. 23
Fire extinguisher	1 in the corridor- front of Room No.32(II Floor)

Personal Protection:

- **Laboratory Attire:** Confine long hair, loose clothing and dupatta.
- **Eye protection**

General Instructions

The course teacher, lab assistant, housekeeping staff and the students should ensure that the laboratory is tidy and maintain a safe environment.

Course teacher has to provide the lab instructions at the beginning and during the process of clothing construction, monitor the students during the lab session, take prompt and immediate action when problem occurs.

Lab assistants should ensure that the sewing machines are in good working condition and other sewing supplies are kept ready before the lab. Borrowers' book has to be maintained.

- Food or drinks are not allowed inside the lab.
- Visitors are not allowed inside the lab.

Responsibilities of students during lab sessions:

- Students are expected to bring the necessary sewing supplies and maintain silence during lab sessions.
 - Students have to become familiar with the parts of a sewing machine and its operating procedures and are to follow the instructions given at the beginning of the lab session by the course teacher.
 - Check to ensure that all parts of the machine are working and functioning properly before commencement of the lab session. Students should use only the allotted sewing machine.
 - Set up the sewing machine with the correct needle, thread, and desired sewing tension based on the fabric to be stitched.
 - Ensure that there is sufficient light while working, to avoid eye strain.
 - Always keep face and hands at a safe distance from the needle while sewing.
 - Unplug the electric sewing machine after the lab session.
 - Sewing machine covers to be put below the table while the lab is in session and the machine to be covered at the end of the lab session.
-
- Stools and other sewing tools used from the lab are to be placed back in the respective place after the lab session. Borrowed tools, if any, are to be returned to the lab assistant.
 - Work area should be maintained clean always. Unwanted fabrics bits, broken needles and lint have to be disposed as needed.
 - If an accident occurs, report it immediately to the course teacher
 - Accidental breakage should be reported immediately.
 - Apart from during the lab hours, students are allowed to use the lab only with the permission of the course teacher.
-

NURSERY SCHOOL

Objectives

1. To provide 2 1/2 to 3 1/2 year old children a “learn while you play environment” that promotes holistic development and facilitate a smooth transition from home to formal school.
2. To provide undergraduate students a nursery school laboratory to observe, study and interact with children in the early childhood stage and obtain skills in the conduct of a preschool programme.
3. To serve the college community and the community at large with play school facilities for pre-kindergarten children

Responsibilities

1. Staff should ensure efficient functioning of the nursery school with regard to admission procedures, purchase of all necessary items and maintenance of accounts for the same.
2. To follow a daily schedule and update all the registers like-attendance, height and weight, etc systematically.
3. To provide individual care and learning experiences to the children that promotes good physical, social, emotional and intellectual development.
4. Maintain proper parent teacher relations.
5. Supervise the nursery kitchen to ensure provision of nutritious snacks and meals.
6. To train the children to develop proper eating habits.
7. To ensure safety and cleanliness.
8. To provide first aid when necessary and call parents immediately if a child is sick.
9. Ministerial staff to maintain cleanliness of physical surroundings and all equipment.
10. Care for hygiene and safety of children at all times.
11. Cook hygienic snacks and meals following the prescribed menu plan.

Procedures

1. Each student must read and understand the procedure before a lab session and carry their observation books.

2. Students must be sensibly attired in clean and comfortable clothing that allows free movement.
3. Students suffering from a cold or fever will not be permitted to enter.
4. Students must not give their pens and pencils, any sharp items or their belongings to the children.
5. Should at all times ensure their safety and the children's safety by being alert and watchful specially while using the play equipment.
6. Should not give the children anything to eat.
7. Should not pet or tease the children.
8. Should not share children's photos or any other information on social media
9. Should immediately alert teachers if they observe anything amiss.
10. Students must not use children's play equipment or furniture.

DEPARTMENT OF ADVANCED ZOOLOGY & BIOTECHNOLOGY

Standard Operating Procedure for UG Laboratory

General Information:

1. Physical hazards: All heavy equipments, electrical and mechanically operated appliances, bunsen burners, hot water,
2. Chemical hazards: Acids, alkali, ammonia odour, chemical sensitizers
3. Biological hazards: Bacterial cultures

During Emergencies:

Equipment	Location
First aid kit	Room No. 35
Fire extinguisher	2 in the corridor • One in front of Room No.33 • Second one in front of Room No. 34

Emergency Contact:

Name	Designation	Mobile Number
Dr. Betsy Selvakumar	Head of the Department	9940301394
Mr. Ponraj	Estate supervisor	9994455370

Personal Protection:

- **Laboratory Attire:** Cotton clothes, no dupattas/ stoll, scarf, knee-length lab coats, appropriate footwear, hair to be tied
- **Eye protection:** Safety glasses

General Instructions for lab usage:

- All people using the undergraduate laboratory – course teachers, lab assistants, housekeeping personnel and students should be actively involved in the laboratory upkeep and maintain a safe environment.
- Course teachers play a vital role in disseminating appropriate instructions and monitoring the students.
- Lab assistants should ensure that gas valves are turned off after lab sessions.
- No food or drinks are allowed in any lab.
- No visitors are allowed in any lab.
- Lab assistants provide necessary supplies, chemical solutions, and equipment in accordance with the Course requirement.

Responsibilities of students during lab sessions:

- Each student should read the procedure before coming to the lab.
- Dissection/ monocular microscopes should be cleaned before and after use.
- Never operate an autoclave, cooling centrifuge, ELISA plate reader, trinocular and phase contrast microscopes.
- Be careful when handling chemical reagents and bacterial cultures.
- No mouth pipetting of reagents.
- Never taste or smell a chemical.
- Accidental breakage of glassware and spilling of reagents should be reported immediately.
- Each student should clean the work table and push their stools under the table at the end of the lab session.
- Wash your hands thoroughly with soap before leaving the lab.

DEPARTMENT OF PHYSICS**Undergraduate Physics Laboratory**

This manual is intended to provide basic rules, regulations and general guidelines with regard to the Department of Physics in order to:

- a) Promote safe and best practices in the laboratory
- b) Create awareness of the risks involved in doing laboratory procedures

1. General Information:

- Possible physical hazards
Electrical, electronic and heating devices, glassware and heavy equipments
- Possible chemical hazards
Acids, vapours and flammable substances
- Possible biological hazards
Bacteria and fungi

2. During emergencies:

- First aid kit is available in Room no. SB 10.
- Fire extinguishers can be found in front of Rooms SB 3 and SB 10.
- In case of any medical emergency or fire inside a laboratory, inform the faculty and technical assistants as soon as possible and follow their advice.
- If fire occurs in any live electrical equipment, switch off the mains immediately and pull out the plug. Use an appropriate fire extinguisher (Class C type), dry chemical - carbon dioxide.
- Always make sure that the fire-escape routes are clear. Fire doors must never be jammed open. If the situation looks dangerous, leave the lab immediately through the nearest exit.

3. Safety precautions/ procedure

- All kinds of spills or broken glassware, thermometer & equipment, no matter how minor they may be, should be reported to the staff in the laboratories immediately.
- Bare cables/electrodes in an electrical circuit or power supply should never be touched. They may carry lethal voltages.

- Direct or reflected laser light should not fall on naked eyes.
- Some experiments involve heating objects (water, metal and oil) up to nearly 100 °C. These can cause severe burns if not handled with care.
- Smelling or tasting a chemical (known or unknown) is not permitted.
- Broken glassware should be handled only with dedicated gloves and not using bare hands.

3. General instructions for laboratory usage

- All the mains cables must be checked periodically for any damage. They must be plugged in to the socket before switching on the electrical equipment. The equipment must be switched off before unplugging the cable. Cables should not be unplugged by pulling the cord.
- All the electrical cables used in the experiments must be properly insulated. Presence of any faulty cable should be reported and replaced immediately.
- Proper grounding of equipment should be checked by the lab assistants before usage. Help from electrician may be taken if necessary.
- Every apparatus should be examined for defects/damages before the lab sessions. Damaged, cracked, or defective equipment should not be set up for use by the students.
- Equipment must be properly positioned to minimize the need for electrical wires trailing across the floor.
- Use of double adaptors is not allowed.
- Trolleys or appropriate carriers should be used to convey equipment, materials and chemicals.
- Any equipment that becomes faulty must be removed, labeled appropriately and sent for repair or discarded as decided by the faculty after checking.
- Regular servicing by the suppliers/ companies should be arranged for equipment with warranty or AMC.
- All electrical supplies must be safely turned off after use.
- Bunsen burners and rubber tubing should be checked periodically for any defect/damage.
- Use of mobile phones inside the laboratories is strictly prohibited.

- Visitors are not allowed to enter the laboratories.

Instructions for students during lab sessions

- Every student is expected to carefully read through the safety rules and regulations pertaining to the Physics laboratories before working in the lab and strictly adhere to these rules while doing experiments.
- Doing experiments in the laboratory without supervision is prohibited.
- Replacing, swapping or moving equipment that has already been set up by the lab staff is prohibited.
- The performance of unauthorized experiments and the use of any equipment in an unauthorized or unsafe manner are strictly forbidden.
- Lab tables should be kept clean and organized, both during and after the lab sessions.
- Every apparatus should be examined before performing any experiment. Faulty or defective equipment should not be used. If something does not look safe, it should be reported to the faculty members and lab assistants immediately.
- Burners should not be lit by the students. The lab assistants may be requested to light the burners while doing experiments that involve heating.
- It may be ensured that no experimental setup with open flames, heated substances, live electrical cables, switched on lasers, etc. is left unattended when it is not operated.
- Electronic components/glassware/optical elements used for the experiments should be returned at the end of the laboratory session and appropriate entries made in the log book provided.
- Any electronic component/ glassware/ optical element broken by the student during the course of the experiment should be reported immediately and necessary entries should be made in the Breakage Register.
- Students should not be barefoot while doing experiments, especially when plugging or unplugging cables.
- Shoes that completely cover the feet should be used. High-heeled shoes are not permitted in the laboratory.

- Long hair should always be tied up to avoid hair falling before the eyes while performing experiments.
- Any loose articles of clothing (shawl/ duppatta) or dangling jewelry which can get entangled in the equipment should be removed. Instead, lab coats are encouraged.
- No food item is allowed inside the laboratory.
- Water bottles, bags, and other personal items should be kept in the allotted areas, and not on the bench tops or in the aisle. Faculty and students should be able to easily move around in the lab.
- Thorough washing of hands while leaving the lab after lab hours is advised.

Guidelines for experimental procedure

- Procedure sheets with necessary instructions, formulae, model graph and tabulation for each experiment, will be provided to students at the beginning of the lab course.
- The given procedure sheet is a basic guideline. Every student is expected to have a fundamental understanding of the principles involved in the experiments before coming to the lab.
- Physics lab worksheets should be purchased from the stores. Formulae, circuit diagram, tables and method of calculation of least count for measuring instruments should be written before entering the lab.
- All observations during the course of the experiment should be noted down in the worksheet and should be attested by the faculty in-charge.
- Further, all calculations up to the result should be done in the worksheet and submitted in a file along with the procedure sheet.
- Submission of files should be done on the next working day after the lab session, in the respective racks provided in the labs.
- Each experiment will be evaluated for a maximum of 10 marks based on preparation, observation, calculation and accuracy of the result.
- The marked files can be collected from the racks and students are expected to recalculate and submit or repeat experiment, if necessary.

- At the end of the course, all the procedure sheets and worksheets should be arranged date wise and bound as a record notebook. No separate record writing is needed.

DEPARTMENT OF COMPUTER SCIENCE

MILDRED ALLEN COMPUTER LABORATORY

General Information:

- 1) Physical Hazards: All heavy equipment, electrical equipment such as Computers, Printers, LCD projectors
- 2) Biological Hazards: None

During Emergencies:

First Aid kit	Staff Room
Fire Extinguisher	Lab Anteroom Entrance

General Instructions for Lab Usage:

- Place your bags in the racks provided outside the lab and also remove footwear and place them in the lower racks.
- Maintain silence inside the laboratory.
- Each student may use only one computer at a time.
- Login using the username and password provided to you and remember to log out at the end of the session.
- Use the lab machines and internet facility only for academic purposes.
- Do not change the settings / background / screen saver in the lab machines.
- Do not bring food / drinks inside the lab.
- Do not attempt to move /repair/tamper with the lab machines. If there is any problem with your machine report to the faculty immediately.
- Do not install or download any software or modify / rename / delete files in the lab machines without the faculty's permission.

- Do not access personal email accounts in the lab.
- Do not use external storage devices such as flash drives / external hard disk without the faculty's permission.
- Do not write on the monitor, IQ Board, projector screen or any other gadgets in the lab.
- Shutdown the machine at the end of the day.
- Visitors are not allowed in any lab without permission.
- Do not change the settings of the air conditioner as the temperature in the room has to be properly maintained.

Safety Procedures & First Aid:

- Know the location of the fire extinguisher and the first aid kit and how to use them in case of an emergency.
- Report smoke / sparks / burnt smell to your faculty / lab assistant immediately.
- Report any broken plugs or exposed electrical wires to the lab assistant immediately.
- If you find unusual sound or smell in the lab report immediately to your faculty
- Do not attempt to open the system casings or monitor casing. You may get electric shock.
- Do not insert metal objects such as clips, pins and needles into the computer casings. It may cause fire.
- Maintain a good sitting posture when you work in the lab.
- Never work alone in the lab
- Be aware of the surroundings

DEPARTMENT OF COMPUTER SCIENCE AND TECHNOLOGY

COMPUTER LABORATORY

General Information:

Physical Hazards: All heavy equipments, electrical equipments such as Computers, Printers, LCD projectors, UPS, air conditioners

During Emergencies:

First Aid kit	Server Table and Staff room
Fire Extinguisher	Opposite to UPS

General Safety Instructions:**Do's**

- Read and understand the Standard Operating Procedures for the Laboratory.
- Know the location of the fire extinguisher and the first aid box and how to use them in case of an emergency.
- Report smoke / sparks / burnt smell to your staff / lab assistant immediately.
- Report any broken plugs or exposed electrical wires to your staff / lab assistant immediately.
- Report the gas leakage / non-functional AC immediately to the staff / Lab assistant.
- Report immediately to staff if you experience electric shock while touching the computers.
- Maintain a good sitting posture when you work in the lab.

Don'ts

- Do not open the system unit casing or monitor casing particularly when the power is turned on.
- Do not insert metal objects such as clips, pins and needles into the computer casings. They may cause fire.
- Do not touch, connect or disconnect any parts, plug or cable without permission.
- Do not touch any of the circuit boards and power sockets when a device is connected to them and switched on.
- Do not write on the Monitor, IQ Board, Projector Screen or any other Peripherals.
- Avoid stepping on electrical wires or any other computer cables.
- Do not unplug and switch mouse for left hand students. Simply have student move the mouse to the left side of the keyboard and replace on right side when done.

- Do not interchange the mouse/keyboard/monitor of the computers. If you find that the mouse/keyboard/monitor is not functioning, inform the faculty.
- Do not work alone in the Lab.
- Do not enter the lab if you have any contagious diseases.
- Do not change the settings of the air conditioner as the temperature in the room has to be properly maintained.

General Instructions for lab usage:

- All people using the laboratory – course teachers, lab assistants, housekeeping personnel and students should be actively involved in the laboratory upkeep and maintain a safe environment.
- Leave your footwear outside the Lab in the designated area.
- Food or Drinks are not allowed in the computer lab or anywhere near a computer.
- Visitors are not allowed in any lab without Permission.
- Maintain silence inside the Lab.
- Use only one computer at any time.
- Do not use the Servers.
- Do not sit on the computer tables.
- Computer settings like desktop, screen saver, etc. should not be personalized.
- Downloading or installing any software is not allowed without permission.
- Maintain a back up copy of all your important data files in the Server.
- Lab assistants should ensure that Air Conditions are turned off after lab sessions.
- Do not attempt to repair, open, tamper or interfere with any of the computer, printing, cabling, air conditioning or other equipment in the laboratory. Only experienced technicians should attempt to repair.
- Do not pull / push the computer table as it might damage the Network cabling.
- External devices like hard disk, CD, USB etc should not be used without permission from the staff.
- Do not save any files in My Documents / Desktop / C drive. Create folders in drives and save your files in it.

Responsibilities of students during lab sessions:

- Each student should read the procedure before coming to the lab.
- Enter the lab with permission.
- Keep bags in the designated area neatly.
- Bring the Log Sheet for every lab session and fill in the date with the allotted system number you are using for that lab session.
- Log-on with your username and password for your use only. Never share your username and password.
- Internet use is limited to teacher-assigned activities or classwork.
- Personal internet use for chat rooms, instant messaging (IM), or email is strictly prohibited.
- No Internet gaming activities are allowed.
- If by mistake you get to an inappropriate internet site, turn off your monitor immediately and report to the staff.
- Ask permission to print. Send the print command to the printer only once. At the instance of the print command being nonfunctional, inform the staff.
- Close all open windows, applications, and log out before leaving the lab thus leaving the computer ready for the next person's use.
- Students should clear the work table and arrange their chairs at the end of a lab session.

Responsibilities of the staff during lab sessions:

- Review instructions prior to class for efficient use of the computers as Course Teachers play a vital role in disseminating appropriate instructions and monitoring the students.
- The teacher must remain in the lab and is responsible for the discipline of the students.
- Make an entry in the Lab Log Register for every lab session.
- Keep user name and password of the server system confidential.
- Instruct students in Internet Safety.
- Create student login accounts for your course at the beginning of every semester, if necessary. Delete the accounts at the end of the semester after the lab exams.

- Teachers are expected to closely monitor student activity by frequent screen checks and also by checking the URLs they had visited.
- Make an entry in the Maintenance Register about any computer with missing or damaged hardware or peripherals and any non-functioning computers.
- Teachers should clean the whiteboard, turn off the projector after every use, shut down the server and inform the lab assistants.
